

Serious issues.  
Real leadership.

*on the environment*

**We live here because we want clean water, clean air, and a safe, healthy environment for our children and families.**

I have been a **tireless fighter for our local environment** and quality of life, now and into the future. ✨ With the help of some of your neighbors, I've pushed for what our elected officials have ignored, helping create the Farmland and Natural Areas Program Citizen's Committee, the DNR Chub Lake Wildlife Management Area, and the Citizens Energy Task Force—a watchdog of the controversial Cap X powerline project. ✨ "Green" is good business. Encouraging **responsible and environment-friendly industries** can spur economic development and create many new high-paying jobs. ✨ As a Eureka Township Supervisor and a member of the Dakota County Planning Commission for nine years,

**I've fought long and hard for maintaining the quality of our water, air, woodlands, wetlands, and farmland.**

**Bev Topp:** Serious issues. Real leadership.
